

EUROPE'S FIRST BYDV RESISTANT WHEAT.

Grow to expect the best

RGT WOLVERINE

BYDV RESISTANT WINTER WHEAT

TYPE:
GROUP 4

SPECIES:
WINTER WHEAT

END MARKET:
FEED

CHARACTERISTICS:

- > Europe's first BYDV resistant wheat.
- > Very high yielding, even when BYDV is absent.
- > Consistent performer in all regions.
- > Good disease resistance.
- > Excellent straw strength.
- > Good grain quality.

Europe's first BYDV-resistant wheat is a major breakthrough in European plant breeding, offering farmers an alternative to chemical control. RGT Wolverine is a newly recommended Group 4 feed wheat producing very high yields, whether BYDV is present or not, offering security, ease of management, and peace of mind. Its performance is underpinned by a solid agronomic package and a strong disease resistance profile.

RGT Wolverine.
